# YOU CAN CURE Yourself of

While engaged in the general practice of medicine I had many patients suffering from entarrh whom I was unable to cure, although I prescribed for them by the rules taught in medical books and colleges. I saw that the methods of treatment were wrong. I reasoned that as Catarrh is produced by breathing cold and damp air, so it should be cured by breathing a warm, medicated vapor.

After nine years of investigation I discovered a combination of healing herba, leaves and flowers, which, when ignited, and the warm fumes inhaled, would instantly relieve and in a short time cure extarrhal diseases. The ACCOMPANYING ELLUSTRATION shows how the warm, healing vapor is carried directly to the very parts affected. This remedy fights and hills Catarrh where liquids, sprays. Souches, salves and medicated creams cannot possibly go.

It is the only reliable treatment ever listcovered, and is so simple and conscient that it can be used at home by man, woman or child.

It will cause sheety-five in every one handred causes.

It will cause alsety-five in every one handred causes.

My discovery proved so successful that I was obliged to give up my general practice and for thirty-one years have made Catarrh my specialty.

My remedy will cure Catarrh of any and every form in the nose, head, throat, middle ear or lungs. No matter who or what remedy has failed, this will cure you. I speak confidently because I have

when you try my free sample and see how the warm, pleasant will be convinced. Many write me that they were cured by the free sample alone. The full treatment is not expensive. The regular package, containing enough to last one whole month, is sent by mail postpaid for \$1.00. It is not on sale at the drug stores, as I wish my patients to get the medicine fresh from my laboratory or from my special local agents.

Remember, a postal card with your name and address will bring you this free triol treatment. It will also bring you free my interesting book "Plain Facts About Catarrh."

DISTILLERS

Russian race is not a pure one, as the Russians have taken in and assimilated a variety of Finnish and Turko-Finnish elements, but, curiously enough, the Slavenian type has maintained irself with remarkable persistency, as cranlological features as are seen in those of our own day. This may be explained by a variety of causes, but the chief reason is the maintenance by the Slavenians of Gentile organization and Gentile marriages.

Russians themselves rarely emigrate as isolated individuals: they migrate in whole villages, so that the type is preserved as the colonization of the different parts of the country is carried on by these compact bodies. The overwhelming numbers of Slavenians and the very great differences in ethical type, belief and mythology between the Aryans and Turanans may have contributed in the same direction, and throughout the written history of the Slavenians it is noticeable that while a Russian man far way from his home among Siberians readily marries a native, the Russian woman seldom does the same.

RARE DEGREE OF PURITY.

RARE DEGREE OF PURITY. RARE DEGREE OF PURITY.

All these causes have done much to enable the Siavonians to maintain their ethnical features in a relatively high degree of purity, so as to assumilate foreign elements and make them re-unforce or improve the ethnical type without siving rise to half-breed races.

The maintenance of the same north Russian type is noticeable from Novgerod to the Pacific, and this in spite of the great variety of races with which the Russian comes in contact.

Another remarkable thing is that in the

Russians proper may be divided into three separate and distinct groups, namely:

(i) Great Russians, or Muscovites, numbering about 60,000,000. These occupy the center of European Russia, and form about three-fourths of the population in the North and East.

(i) The Little Russians, or Male Russians or Rustian, remetimes termed Ukrainians or Rustianians, numbering about 18,690,000. These are found mainly in the southwest, and to this branch the Cossacks may be attached, for they are Little Russians in their language, and have settled in Little Russian, though they have many colonies in the southeast.

(a) The White Russians numbering 5,000,000. These are classified under four district Governments in the west.

Then, again, there are upward of 6,000. These are classified under four district Governments in the west.

Freed in Storm, Wild Beast Drives Freighter Pallanca's Crew Below; Finally Cowed by Spears and Recaptured in Net.

New York, Dec. 2.—A story of the ling dyenture at sea, reminiscent of the epi-nds in Victor Hugo's "Ninety-three," in which a cannon breaks from its leadings.

in a storm, was brought into part by the Hamburg-American freighter Pallansa. The tale is one of a powerful lionees which, frenzied by a storm, got loose from its rage and terrorized the whole crew unto rage and terrorized the whole crew unto rage and terrorized the whole crew unto the two parts of a net.

Fight white swans for Mrs. John Wame-maker of Philadelphia, two ice bears, an estrich, which died on the trip; two antendage for the Cincinnati Zoo, six black swans, a mebra and the largest water buffallo over brought to this country constituted the consignment, in charge of John (witerman, who has brought hundreds of beasts to this side. The water buffalo is for the Bronx Zoo. Hagesbeck, the animal owner, shipped the creatures.

LIONESS EGARED IN TERROR.

When three days out the Pallansa was

When three days out the Pallenna was overtaken by a furious storm. The freight liner lobbed like a cork, and the cases on the upper deck, where the animals had been placed for fresh air, tugged at their

the upper deck, where the animan had been pinced for fresh air, tugged at their lashings.

The lieuwe showed the greatest terror. She reared every time a waw combed over, and hurled herself at the bars. A hip comber finally hurtled against the cage and overturned it. The beast got out and rushed down the slippery deck, reeling and plunging as the slip ducked and ruse. The seamen fied, with the animal in pursuit. She rushed at them, but, unable to keep a straight course, failed to do any harm.

The new went below while the Heness ruled the deck. Her rears rumbled above the shrieking wind. When her rears showed that she was near the stem some seamen, with Outerman, dedged up the companionway and formed in line with long spears. They here down on the lioness and gradually forced her into a corner. Now and then she would attempt to spring past the outstretched weapons but the sting of the steel sont her back.

NETTED BEAST AT LAST.

NEITED BEAST AT LAST.

REPUBLIC SPECIAL

New York, Ded. 2.—Newsboys may now learn the trade of the plumber in their leisure hours, and thus advance themselves on the road to fortune.

Trade schools have been organised recently by the Children's Ald Society. Formerly boys were sent to farms. Its annual report was made public yesterday.

"The Trade School opened last year in the Newsboys' Ledgar-House." the report reads, "gives the homeless and unemployed an opportunity to acquire the elements of the trades of electre wiring and of plumbing. It is hoped that a course of three months' teaching will be enough to train an ambitious toy in the use of tools so that he may be fitted to accept employment. We are fortunate in having the services of a retired warrant officer of the engineer's staff of the navy as head master." Maintenance of this school is derived from the income of 3.000 of the Brace Memorial Fund.

Another improvement is an employment NETTED BEAST AT LAST.

A big not, such as is used in India to mare wild animals, was placed on the openre. It was then pushed over the crouching beast and, under Coterman's guidance, so twisted that the Homas became helpiess. She was dragged ginguriy to the caga, and once again inside her prison was bound with ropes.

It is remarkable that the Homas, under the handicap of a slippery deck, was not swept overboard. After the sterm subsided she lay quietly in the caga, subdued by fright, and refused to touch meat for two days, but she was in good condition yesterday, as were the other animals.

Outerman, who plainly showed the offects of his scare, said that when he has charge of animals at sea again the cages will be so protected that a crackman couldn't open one.

**COWS DESPOILED OF** TAILS TO MAKE ROPE.

California Sheriff Notified of Inho man Bocking of Stock by Ranch Thiores.

Another improvement is an employment agency, which in the last year has found work for 1,042 boys. The society has also established several evening trade classes under the supervision of Frofessor Charles R. Richards, director of the manual training department of the Teachers' College. The society enrolled 14.95 children in its industrial schools, relieved 13,62 at their homes and sheltered 4,552 in longing-houses. Later sixteen of the hogs turned up at the home place, but all of them had been clipped clean of ears. These two complaints coming so closely tegether, are a nevelty in criminal proceedings in Northern California.

LITTLE BREAD EARNERS ARE SEMT TO SCHOOL.

encrivania Public Education Accordation Supplies Honey in Lieu of Their Enraings.

Philadelphia, Dec. 1—At the season's first meeting of the Public Education Association at the Acora Club Miss Dora Keen, secretary of the organization, spoke of the new plan by which the association hopes to cope with violations of the child labor law—the scholarship idea as applied to the lower grades in the public school. As outlined by Miss Keen, the society has awarded scholarships to fourteen children upon whose carmings families were dependent. The children have been obliged to return to school by the child labor law, but the sum of their earnings goes as before to inose dependent upon them.

Careful inquiry into eighty-six cases which at first appeared to demand scholarships narrowed the actual instances of want to fourteen. Other cases will be taken up this winter.

Doctor Joseph Swain of Swarthmore College, who is president of the society, presided ever the meeting. Doctor Carl, Kelsey of the University of Pennsylvania spoke on "The Problems of Relef Raised by Compulsory Education." Benjamin C. Marsh, secretary of the Pennsylvania Society to Protect Children from Cruelty, addressed the meeting on "The Best Methods of Lealing With Truant and Undisciplined Children." Philadelphia, Dec.

HAIR TURNS WHITE IN ONE NIGHT OF WORRY

roung Clerk Accord of Robb REPUBLIC SPECIAL

REPUBLIC SPECIAL.

Philadelphia. Dec. 2.—Whether it was worriment, a wig or poor hair dya the fact remains that John G. Waters' hair turned white overnight after he had been arrested for stealing from the mails.

Waters, who lives in Jersey City, was a mail clerk on the Pennsylvania Railread. He took money from five test letters, and subsequently confessed that he had been stealing for four months.

He was arrested and put into a cell in the Harrisburg fail. When the iron-barred door was locked on him, his hair was dark brown. In the morning it was perfectly white. It has not the appearance of hair that has been dyed, and the police are sure that the clerk did not have a wir, and that even if he had there would have been no opportunity for him to dispuse of ft.

GOATS EATING UP AN ISLAND Gales Assist in Destruction by

Blowing Vegetation Away. Blowing Vegetation Away.

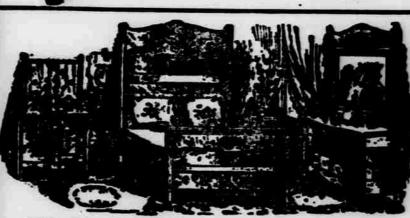

Honclulu, via San Francisco, Nov. 28—
Lanai, the smallest inhabited island of
the Hawaiian group, is being laid bare by
the ravages of wild goats and the blowing away of its vegetation and soil by
high winds. Governor Carter has returned
from a trip to the island in the United
States tug Iroquois. He says that if steps
are not taken to prevent the continued
destruction of vegetation the island will
rapidly become barren.

A colony of about 400 Hawaiians settled
on the bland about twenty-five years ago.
The Governor found only two of them left.
They are natives, each over 160 years of
age, and are the ealy residents aside from
Charles Gay, who issues it, and his empleyes. But for assistance, the two cid
matters would have died from lack of
support.

RUSSIAN DISORDERS CAUSE SCARCITY OF MANGANESE

This Ore, Half of Which Comes Fre Daropo, Has Advanced 100 Per Cont in Price.

REPUBLIC SPECIAL.

New York, Dec. 2.—One of the smaller results of the disorders in Russia is the rapid rise in the price of ferro-manganese, a substance necessary to the manufacture of soft steel. It is now quoted at \$50 at ton; last spring it was selling at \$57 and ton; last spring it was selling at \$57 and ton; last spring it was selling at \$57 and ton; last spring it was selling at \$57 and ton; last spring it was selling at \$57 and ton; last spring in the price has risen 169 per cent since myring and \$50 per cent since myring and the price is "practically none to be had." There have even been rumores of a corner in ferro-manganese.

A big proportion of the world's supply of manganese ore—perhaps one-half of it—comes from Russia. And the stories of riot and bloodshed, even when the work at the mines was not really interrupted, had a tendency to send prices up. Ferro-manganese is about 50 up parts manganese to one part from. More of it is produced in England than in any other country. The duty on it imposed by the United States is about \$4 a ton.

The New York representative of one of the largest English producers predicted a day or two ago that the price of this valuable substance would "ease off" soon. Others my it will go to \$50 a ton.

GOATS ON HIGH TRESTLE HOLD UP ELECTRIC CAR

Blendale Line to Path of the Billys and They Refuse to Give Troiley Right of Way. REPUBLIC SPECIAL

Los Angeles, Dec. 2.—The Glendale elec-tric car leaving the Casa Verdugo at 12.46 the other afternoon stopped on the high trestie at Ivanhoe just in time to avoid a head-on collision.

Two billipgoats, northbound, had reached the middle of the long span, and in spite of all signals persisted in keeping to the left track.

The car came to a stop twenty feet from the goats with the air trakes hard set.

"Too-o-at, too-o-o-ot, toot-toot?" shricked the whistle.

The derelicts shook their heads to the wind and braced themselves for the shock they experted.

Several passengers left the car and pro-ceeded cautiously ahead. One of the goats weakened in his purpose and made to the edge of the frestle. He peered over and observed that it was about fifty feet down, and that the water in the Los An-geles River is not deep enough for a nigh dive.

Deliberately and with remarkable prevation of dignity the goats proceeded their original course northbound on southbound track. The motorman yield the right of way and did not proceed ut they were past, on their way to Tropics
